DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 10 recites the limitation "the sleeve" in lines 2 and 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3, 9 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Bechtold et al (5,092,842).

The Bechtold et al reference discloses a firing device for an injector comprising a cylindrical housing 10, a forward portion 30 of the housing containing spring 29 (Fig. 2), a rearward portion 32 of the housing having an axially movable forward spring-loaded member 66 to cooperate with an trigger 18, an external cocking mechanism 74 operable to energize the spring loading of the member 66, and an operating element 11 to release the spring loading to cause the member 66 to shoot the injector forward against

Art Unit: 3751

the spring 29 to eject a dose to a person, the cylindrical housing 10 being in two parts 30 and 32 separably secured together in end-to-end relationship thereby releasably to contain the injector.

In regard to claim 3, the tubular member 66 has an axial slot 69 open from the forward end of the tubular member 66 and receiving the trigger 18.

In regard to claim 9, the member 66, which is generally tubular (Figs. 3, 5 and 21-24) to embrace the injector, has a coil spring 105 acting between its rear end and an internal abutment at the rear end of the housing 10.

In regard to claim 12, the device has a rotary adjusting knob 74 to set the amount of dose to be injected.

Allowable Subject Matter

6. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed 05/14/04 have been fully considered but they are not persuasive.

In regard to the applicant's arguments with respect to the Bechtold et al reference that Bechtold et al do not provide a cylindrical housing in two parts being separably secured together in end-to-end relationship, examiner respectfully disagrees with the applicant. Figures 1, 2 and 4 of Bechtold et al show two parts 30 and 32.

Art Unit: 3751

New claim 9 is not allowable because claim 9 does not include all limitation of claim 4 which was indicated allowable in the last office action.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
